

ANIK KUMAR

+91-8292692712 anik.kumar.iitr@gmail.com linkedin.com/in/anikkumar

Education

Indian Institute Of Information Technology, Ranchi

Aug. 2023 – May 2027

B.Tech - Electronics & Communication Engineering

CGPA: 7.81

Experience

Software Engineer Intern

June 2025 – August 2025

Sanviro (Remote)

Tools Used: Java, Spring Boot, MySQL, REST APIs

- Contributed to the development of a Patient Management Application by designing and implementing backend modules using Java and Spring Boot.
- Developed and integrated secure RESTful APIs with input validation and authentication for healthcare workflows.
- Designed optimized relational database schemas with data integrity and efficient query performance.
- Collaborated with engineers to integrate AI-driven healthcare features while maintaining secure backend services.

Projects

Distributed Task Queue System 🌀 | Java, Spring Boot, RabbitMQ, MySQL, Docker, JPA/Hibernate June 2026 – Present

- Designed and developed a distributed task processing system using Spring Boot, RabbitMQ, Docker, and MySQL following modular backend architecture.
- Developed secure REST APIs with request validation, DTO-based input handling, and centralized exception management.
- Implemented asynchronous message processing using RabbitMQ with retries, manual acknowledgements, worker isolation, and task status tracking.
- Applied layered architecture, secure coding practices, structured logging, Docker containerization, and scalable microservice design.

Quiz Application 🌀 | Java, OOP, Collections, Spring Boot, MySQL, Railway

February 2026

- Developed a console-based quiz application using Java and object-oriented programming principles.
- Implemented question management, answer validation, and automated score calculation.
- Applied OOP concepts including classes, objects, encapsulation, and modular design.

Skills

Programming Languages: Java, SQL, Python (Basic), Bash (Basic)

Backend Development: Java, Spring Boot, REST APIs, Secure REST API Design, Authentication & Authorization (JWT), Microservices

Cloud & Infrastructure: Docker, Linux, AWS (EC2, IAM, S3, CloudWatch), Containerization, Microservices

Security: Secure Coding Principles, OWASP Top 10 (Learning), JWT Security, Input Validation, Authentication, Authorization

Monitoring & Observability: Prometheus, Grafana, CloudWatch

Core Concepts: Data Structures & Algorithms (600+ Solved), OOP, DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, Postman, Maven, IntelliJ IDEA, MySQL Workbench, Docker Compose

Certifications

AWS Cloud Practitioner Essentials – Amazon Web Services (Cloud fundamentals, IAM, EC2, S3).

Self Learning – OWASP Top 10 for Web Application Security

Master Java – Fundamentals, Collections, Multithreading – Udemy

Spring Boot – Fundamentals, JPA, Security – Udemy

Achievements

- Ranked among the top 5% of candidates nationwide in the JEE Main Examination.
- Solved 600+ Data Structures & Algorithms problems across LeetCode and GeeksforGeeks, strengthening problem-solving and analytical skills.
- Built scalable backend applications using Java, Spring Boot, Docker, RabbitMQ, and monitoring tools following modern software engineering practices.
